Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claims 1-3, drawn to a water quality analyzer comprising an impedance adjustment means utilized for adjusting an input impedance between sensor electrodes.
- Group II, claims 4-6, drawn to a water quality analyzer comprising an impedance element connected between sensor electrodes.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and II share the feature of an impedance element connected between sensor electrodes. Both JP 10-82761 (provided in applicant's prior art of record) and JP 2002-214220 (provided in applicant's prior art of record) both disclose an impedance means located between sensor electrodes. Therefore, the common feature between the two groups, an impedance element, does not provide a contribution over the prior art, and, thus, cannot

be a special technical feature. Therefore, Groups I and II do not relate to a single inventive concept under PCT Rule 13.1.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call was made to applicant's attorney, James Armstrong, IV, to request an oral election to the above restriction requirement, but did not result in an election being made. This application is not currently part of the First Office Action Pilot Program, however, applicant's attorney was informed of the First Office Action Pilot Program during the phone election request. Applicant's attorney was informed that if a request to be included in the First Office Action Pilot Program is filed, this election must be made without traverse to remain eligible for the First Action Pilot Program.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer Dieterle whose telephone number is (571) 270-7872. The examiner can normally be reached on Monday thru Friday, 8am to 5pm (EST).
